Hawker Aircraft Maintenance Technician - Chicago, IL. and inspections to complex modifications and repairs on various types of Citation aircraft. Hawker Reads and interprets aircraft maintenance manuals and specifications to determine.
Aircraft maintenance and training play one of the most important roles in four types of manuals: the AMM (Aircraft Maintenance Manual), the TEM (Tool Equipment Manual), TSM (Technical Standardization Manual), and the MMR (Maintenance Manual). Reading maintenance manuals to identify methods of repair is a crucial skill for aircraft mechanics. Some aircraft mechanics work on many different types of aircraft, such as jets.

The operator of any type of aircraft powered by Jabiru® engines assumes any and all risk relating to the operation of the aircraft, as stated in the Maintenance Manual 22 & 33/JEM0002-5.docx. The AMM is a manual which deals with removal & installation of an aircraft component or LRU's. It does not give any information of O/H. This type of maintenance is detailed in this chapter, which will give brief information about manuals used for aircraft maintenance, their purpose, and relationship.

Types of manuals:
- Aircraft Maintenance Manual
- Type Certificate Data Sheet (TCDS)

Aircraft maintenance personnel can have varying degrees of responsibility depending on the job. The Manual on Establishment and Operation of Aviation Training Centres (Doc. 666) outlines the requirements and responsibilities of these personnel. Adjustments and rectifications which may be made in situ are limited, and therefore the relevant Aircraft Maintenance Manuals appropriate to the type of aircraft must be consulted. The Aircraft Maintenance Technician program at Algonquin College teaches students the knowledge and skills required to equip themselves for work.
